

Hazzem Mohamed Anwar

Junior Backend Developer | Node.js & NestJS

Alexandria, Egypt | hazzem.eljoker@gmail.com | +20 122 322 2608 | github.com/hazzem-web | linkedin.com/in/hazzem-mohammed-9133321a5

PROFESSIONAL SUMMARY

Computer Science student (Expected 2026) with strong backend specialization in Node.js and NestJS. Experienced in designing scalable RESTful APIs, implementing JWT authentication and RBAC authorization, and building database-driven systems using MongoDB and MySQL. Solid foundation in OOP, SOLID principles, and clean code practices.

TECHNICAL SKILLS

Backend: Node.js, Express.js, NestJS, RESTful APIs, JWT Authentication, RBAC, Middleware, Validation, Error Handling

Databases: MongoDB (Mongoose), MySQL, SQL Optimization, Indexing, Data Modeling

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL

Architecture & Concepts: MVC Pattern, Modular Architecture, OOP, SOLID Principles, Clean Code, API Design, Data Structures

Frontend (Basic): React.js, HTML5, CSS3, Bootstrap 5

AI & Data: Python, NumPy, Pandas, OpenCV

Tools: Git, GitHub, Postman, VS Code, Docker, Swagger

PROJECTS

- **Smart Agriculture System (AI-Based) – Graduation Project** – Designed intelligent agriculture monitoring system integrating IoT sensors and ML models (Python) for irrigation prediction and disease detection. Built backend APIs using Node.js/NestJS, stored sensor data in MongoDB with focus on scalability and real-time performance.
- **Banking System API (NestJS + MySQL)** – Built secure banking backend with account management, money transfers, transaction logging, JWT authentication, RBAC, and DB transactions for financial consistency.
- **Library Management System (Node.js + MySQL)** – Designed normalized relational database with book borrowing/return system, due-date tracking, fine calculation, and optimized SQL queries with indexing.
- **Social Media Backend API (NestJS / Express)** – Developed full social platform backend: auth with refresh tokens, user profiles, posts, comments, likes, follow system, pagination, and query optimization using MVC architecture.
- **Course Management System API** – Implemented multi-role system (Admin, Instructor, Student) with protected CRUD operations, middleware-based authorization, and validation using Node.js, Express.js, and MongoDB.
- **Saraha Clone API** – Built anonymous messaging system with secure validation, protected dashboards, and rate limiting.

EXPERIENCE

Information Technology Institute (ITI) – Summer Intern, IoT Track (30 Hours)

Completed hands-on training in Internet of Things fundamentals and practical implementations. Final Grade: Excellent.

EDUCATION

Bachelor of Computer Science – Kafr El-Sheikh University | Expected Graduation: 2026

SOFT SKILLS

Problem Solving: Able to break down complex technical problems and find efficient, clean solutions.

Fast Learner: Quick to pick up new technologies and frameworks — picked up NestJS and TypeScript while building real projects.

Attention to Detail: Strong focus on writing clean, well-structured, and maintainable code.

Self-Motivated: Independently built multiple full projects outside of coursework to sharpen practical skills.

Team Collaboration: Comfortable working in team environments using Git workflows and clear code documentation.

CERTIFICATIONS

- Backend Development (Node.js, MongoDB, REST API) – Mahara-Tech (ITI / MCIT)
- AI Career Essentials – ALX
- Back-End Development – Route Academy
- Front-End Web Development (React.js) – Route Academy
- C++ Programming Fundamentals (OOP & Data Structures) – Route Academy
- Database Fundamentals & Advanced SQL – Route Academy
